New Vistas in Astronomy Adult Lecture Series

This lecture series meets on one **Thursday night** each month, and is geared toward a more adult audience. It is a "mini-course" in astronomy, in which OSU and OWU professors discuss their current research and any new findings in their area of expertise!

Tickets are \$10 for each lecture. Tickets for the entire series are available at a discount.

We have a capacity of 80 guests. Please call us and purchase your ticket in advance. (740)-363-1257

[New Vistas in Astronomy 2019 Order Form](#)

2019 Dates

All lectures begin at 8pm on a Thursday night unless otherwise noted.

Date	Theme	Lecturer
Jan 17th	General Relativity and Gravity Waves - Ripples in the Structure of Reality	Don Stevens, OWU
Feb 21st	When Stars Collide!	Barbara Ryden, OSU
Mar 14th	Exoplanets	Ji Wang, OSU
Apr 11th	Sounding Out the Age of the Galaxy	Marc Pinsonneault, OSU
May 9th	Why do the Stars Shine?	Sultana N. Nahar, OSU
Jun 13th	Climate Change on Earth, Mars, and Venus	Robert Harmon, OWU
Jul 11th	Hidden in Plain Sight: Illuminating the Low Surface Brightness Universe with Next Generation Wide-field Surveys	Johnny Greco, OSU
Aug 8th	Elemental Stories	David Weinberg, OSU
Sep 12th	Tracking Them Down - The First Modern All-sky Search for Variable Stars	Chris Kochanek, OSU
