

Professor Sultana N. Nahar  
Department of Astronomy  
The Ohio State University  
Columbus, OH 43210

April 12, 2016

Dear Sultana,

This letter is written in appreciation of all your contributions and participation in the joint International Conference Aligarh Nano V and STEM Education and Research sponsored by Aligarh Muslim University and the Ohio State University under the Obama-Singh 21st Century Knowledge Initiative Award of USIEF held at Aligarh Muslim University during March 12-15, 2016.

The special memento of AMU Victoria Gate for this conference represents your contributions as the co-convener for various tasks, inviting speakers both international and national, and delivering several presentations, and other involvements. We also appreciate your sponsorship of the four prizes for the best oral and poster presentations in physical sciences and in biotechnology.

We share the success of the conference and will continue to work together for future AMU students, conferences and other academic activities.

With my best wishes,

A handwritten signature in blue ink that reads 'Alim H. Naqvi'.

Professor Alim H. Naqvi  
Convener of the conference and AMU representative of OSU-AMU STEM ER Project  
Founder and Director of Center of Excellence of Nanomaterials and Nanosciences  
Department of Applied Physics  
Aligarh Muslim University  
Aligarh, India
