To Whom It May Concern

Subject: Letter of support for attending CDM 2016 conference

I am a faculty advisor and co-supervisor of Taqseer Khan at the Ohio State University in Columbus, Ohio. Taqseer is a young student which is interesting in research topics related to Analysis. At the present he is working at his PhD thesis which focus on Approximation Theory also we are just finishing a joint paper on behavior of s-numbers for Volterra type operator in which we obtained interesting and sharp results which over passed any recent results in literature (i.e. we exactly described Kolmogorov, Approximation, Bernstein, Mytiagin, and Gelfand numbers).

I believe that attendance at CDM 2016 conference at Harvard will be extremely beneficiary for Taqseer and will help him to see the new trends and developments in Mathematics. I think the specially talk by Laszlo Babai about symmetry and regularity will be interesting for him together with lectures on Kadison–Singer problem.

In the case that you any question, please do not hesitate to contact me.

Sincerely,

Jan Lang
