

Women STEM Roadshow

Survey report for 5-6th Feb.

No. of Participants \rightarrow 33

After reading all the pre-workshop survey and post-workshop survey it is observed that results meet with expectation. They have got to know about studies opportunities in US. They got better understanding to achieve carrier goal, Writing resume, online courses. Students got motivated to choose STEM fields for higher studies. They repeatedly appreciated the speakers of workshops. They admitted that the stereotype of thinking like studying abroad is possible only for elite class has broken. Their doubts has got cleared about choosing STEM fields and studying abroad. Some of them have mentioned their favourite speakers name and also describe how their lecture has influenced their mind. Students have appreciated ambience, food, venue, their interaction with speakers and wanting for further one year.
