Women in STEM Roadshow (Feb 7th -8th, 2018)

Total number of participants = 55

The overall response of students was overwhelming most of them thanked STEM for the confidence and clarity of thought they got after the workshop. They now have the knowledge on how to apply for Universities in the United States of America. STEM workshop served the purpose of spreading awareness about the vast and vivid nature of science, the workshop managed to give the participants a glimpse of the outside world. Phenomenal speakers came forth and blessed the workshop with their teaching experiences about how to carve the right path in the life and the importance of science in the modern world. It was mesmerising to see how they managed to blend science and culture on the same podium. The participants were motivated by the life lessons given by experienced standard-bearers of science they were given an overview of the diverse fields of technology and were encouraged to form strategies for their study, incorporate hard work and dedication with newer technologies as a constituent part of their lives. A better understanding of how to achieve career goals with regards to stem fields was provided to the participants.
