

Survey Report of Workshop – 5 : Patna, by Syed Hasanain

Women In Stem Roadshow

13th & 14th Feb 2018

The 5th Stem Roadshow was held in Patna during 13th & 14th Feb 2018, The survey showed high inspiration and motivation.

As the participants write, it was very proud moment for us because there were multiple cities in India who wanted to host this Road show. We are lucky that our esteemed guests from USA picked Patna. The esteemed guests from USA are here to help us achieve success and fulfill our dreams for higher education.

You inspire us to be confident and to always challenge ourselves. Throughout Road show, we've turned to you as our mentor and inspiration. When we decided to apply for the higher education in USA, you supported us every step of the way.

You showed us that this Road show project wasn't just another assignment — it was an opportunity to show the world what we can do. You gave us the confidence to believe that we're smart and capable. Here in Bihar, we don't always have the chance to pursue every idea, but with you as a great mentor, we had every opportunity to show our talent and passion. Even if we happen to be in remote area away from high-tech education and don't have as many women in STEM, but we can be part of the best Science Competition in the world. This Road Show has very positive impact here on young students who are the future because you all view the world with an entirely different perspective especially due to the fact that STEM teaches us the logic, reasoning, and patience that is needed for success. I specially thank Dr Sultana Nahar, Dr Anil Pradhan and Dr Karen Irving, they are renowned scientists and authority in their areas. I am sure under their guidance we will achieve success.

I am also thankful to schools and college teachers, professors and administrators that they have supported me for this program.

We are looking forward and expecting more interaction with you in future.
