

Dear Dr. Sultana

I would like to thank you very much for the lectures and the effort done to try to introduce the atomic astrophysics.

The lectures were so organized and clear, they were condensed but covered a lot of subjects stressing on the important physical effects, formulae, definitions and processes. I discovered that you covered almost eight chapters from the book in a simple manner. You succeeded in making the lectures very interesting and attractive.

The (lectures + book) add something to me, it turned my attention to astrophysics and the atomic data and atomic processes needed for this and that there is an open research work still has to be done in this field. (my main interest was in atomic data for fusion).

The book is a very good reference that every one who is interested in atomic physics, spectroscopy and plasma should keep it in his shelves.

It was a pleasure to have you with us and hope that the collaboration will continue in future.

www.astronomy.ohio-state.edu

we have learn a lot From this course especially specially the practical part i.e, How to get output From Given input in Computer Lab. also the theoretical part is very useful because it gives us what we need in Spectroscopy and astronomical part, finally if possible we need more time to learn more

The lectures are very useful and the Teaching Methodology are very good and we know alot of information about the Atomic spectroscopy and Astronomy. Thanks very much

① - Mohammad Zaki Mansour
- The lectures was interesting, Dr. Mahat was excellent

Prof. Shahinaz Yousef
Prof Sultana is an excellent lecturer. She is mastering the subject. She has the capability to catch the attention of the students all the time. She uses brain storm and ask the students question frequently. The application of the course is adequate. She has a sweet personality. In my opinion she is one of the best lecturers I have attended.

3 - Nouran Essam The Course is good and needs more simplification in Labs.

④ Osama Ahmed The course is good

⑤ Samartema. The Course is interesting

⑥ ~~Nayira El Gammal~~

Nayira EL Gammal : Prof Sultane is excellent lecture and The course is interesting.
