

March 22, 2024

Dear Dr. Nahar,

On behalf of the Fellowships Office of the National Academies of Sciences, Engineering, and Medicine, we would like to thank you for the valuable service that you provided as a reviewer for the evaluation of applications during the March 2024 NRC Research Associateship Programs Panel Review.

More than 125 applications were reviewed in this first competition of 2024. Awardees selected through this process are eligible to become NRC Research Associates to serve as guest investigators in one of the sponsoring federal laboratories. NRC Associates will conduct research on the projects that they proposed as part of their application. The success of the selection process is based on the dedicated, voluntary service of distinguished individuals, such as yourself.

We hope that you enjoyed participating in the virtual panel review, and we look forward to working with you during future online reviews later this year.

Sincerely yours,

Elizabeth Prescott, D.Phil.  
Director, Fellowships Office  
Policy and Global Affairs
