February 7, 2025

Dear Dr. Nahar,

On behalf of the National Academies of Sciences, Engineering, and Medicine, thank you for your valuable service evaluating applications for the NRC Research Associateship Programs. Your participation as a 2014-2024 reviewer for the Physics panel is greatly appreciated by the National Academies, our sponsors, and awardees.

The National Academies regularly refreshes committee compositions – including review committees – as members reach a maximum number of years of continuous service or as the need for specific expertise changes. Regrettably, we could not invite you to participate in the 2025 NRC Research Associateship Programs review committee. However, the National Academies may call upon your expertise in the future, and we hope you will again consider serving.

For more than 70 years, the NRC Research Associateship Programs have supported the national research mission by providing career development opportunities for scientists and engineers to cultivate a vibrant research environment within federal laboratories. Your distinguished voluntary service to the selection process has made that possible.

We thank you for your dedicated assistance.

Sincerely yours,

Elizabeth Prescott, D.Phil.
Director, Fellowships Office
