From: The Hayes Organizing Committee
and CGS

Suttarna N Nahar

Thank you for helping ideas grow!

**Grow Wildflowers!
How to plant this leaf:**

Soak the leaf in water overnight. Fill a planter pot $\frac{3}{4}$ of the way with potting soil. Place the wet leaf in the pot and add a light layer of soil on top to hold in moisture. Water well, especially during the first 4 to 6 weeks. Transplant outdoors once sprouted.

Thank you so much for supporting
~~graduating~~ graduate students!

We appreciate your time and expertise
and could not have done the
Hayes Forum without you. Thanks!
