Dear Scholar,

I write to congratulate you on your completion of the research-based online course “Atomic Astrophysics and Spectroscopy with Computational workshops on Superstructure and R-Matrix Codes II,” taught by Professor Sultana N. Nahar and guest lecturer Professor Anil K. Pradhan from the Department of Astronomy at The Ohio State University.

The study you engage in is central to the mission of Ohio State: to attract the brightest minds from around the world, to educate citizens for global engagement and produce knowledge to help solve the world’s most pressing issues, and to engage its international constituencies in order to integrate and elevate global engagement across campus, with the community in which we reside, and throughout the world.

My best wishes to each of you for your continued academic success.

Best,

Gil Latz, Ph.D.

Vice Provost for Global Strategies and International Affairs
