

Mentor Fellow, Aligarh: Safia Sultana Aligarh Girls School, Aligarh 23/08/2018

Students carried out experiments and critical analysis,

Students of AMU girls school were engaged in activities(as written on the board for some experiments) based on the concept thus felt the urge to continue the scientific expedition at high level. Skills, knowledge, critical thinking, scientific inquiry were developed. This motivated them to pursue science in higher classes

Students of AMU girls school of standard 8, got an opportunity to make science model and explain the concept behind it. My guidance motivated them and developed interest towards critical thoughts and scientific enquiry.

With regards, safia sultana, AMU, Aligarh
