Report Motivating students to STEM events

Dear Madam,

I thank you for enlightening me, my colleagues and students in varied career options through STEM ROAD SHOW. Our students belong to the under privileged sections of the society, who have very little exposure for selecting their goals. The STEM helped the students to understand the importance of Science and Technology in connection with Job aspects in the field of science and technology. My colleagues Smt. G. Lavanyachandra, Smt. S.Deepika and myself encouraging/motivating the students by exposing them to various Science Fairs, Mathematical Olympiads and other competitive exams in the field of science and technology. Specially in our college the students are learning by doing experiments rather than rote memory. The 12th Grade students who have attended the STEM Programme have successfully completed their 12th Grade and got admissions in Engineering/Life sciences at Under Graduate level. The 11th Graders also completed successfully with distinction. Now they are aiming at getting admission in Medicine/Computer Science Engineering in APEX Institutions.

I am going to attend Orientation Programme at Regional Institute of Education at Mysore, which is going to commence on 30th September 2018, for a week. At orientation programme I will try to incorporate the objectives, what I learnt at STEM, Hyderabad.

My colleagues and myself are encouraging the students under the guidance of our Principal Mr. Srinivasulu Bhatta in the light of STEM Programme.

Thanks & Regards,

Smt.Sujatha Kolkipamala
